Abstract of Project

Type of Model: Prototype

Choice of Technology adopted (Briefly write): No Any Technology Use & REFERED Various Is Codes

How the project is eco-friendly? Explain briefly: Yes, Rubber is Non Biodegradable Material We Use This Material Partially Replacement With Coarse Aggregate

Whether locally available resources & materials are used? Explain which & how used? Yes Locally Available Material Used Cement, Sand, Aggregate, Rubber (11.48.2.72)

Explain the functioning (working) of the project in brief: WE USE Crumb Rubber Chips PARTIALLY REPLACEMENT WITH COARSE AGGREGATE

Explain briefly how the project is user friendly? Yes Our PROJECT User friendly Because WE USE CRUMB RUBBER CHIPS PARTIALLY REPLACEMENT WITH COARSE AGGREGATE

Whether the project is complete or whether further development can be made? Yes Our Project In Complete But Further Development Should Be Remaining

What is innovative in the project? Explain: WE USE The MATERIAL Is Rubber PARTIALLY REPLACEMENT WITH COARSE AGGREGATE

Explain in brief the impact of the project on Society in terms of cost, time, energy saving, health: Overall Construction Cost Save & Energy Save Because Of NON BIODEGRADABLE WASTEAGE Material Used In Concrete, Reduce Of Gases PRODUCED By Ignition Of RUBBER Waste This Problem Minimise Because WE USE CRUMB RUBBER CHIPS PARTIALLY REPLACEMENT WITH AGGREGATE
